

WHY CLEARSKY TELEMATICS?

ClearSky™ is the simple, flexible and easy-to-use fleet management solution from JLG. ClearSky takes the guesswork out of managing your fleet. It translates complex data into usable solutions, so you can anticipate problems and maximize productivity.

- Proactively manage the health of your equipment
- Improve fleet performance and productivity
- Increase equipment uptime and utilization rates
- Lower total cost of operation
- Enhance fleet security and visibility

	ClearSky Locate	ClearSky CAN
	3-Wire option (Fits most JLG Machines)	CAN option fits: Most JLG Booms, Scissors and Telehandlers
Kit Price	See Online Express® Or Contact JLG Sales	See Online Express® Or Contact JLG Sales
3-Year Plan - Data Only, Data & Portal		
Communications	Cellular GPS location-based service	Dual CAN bus Cellular GPS location-based service
Power Source	6V-24V DC input; internal 6600 rechargeable lithium-ion battery	9V-32V DC input; backup battery
Description	Plug-and-play module includes internal battery, internal antenna and harness	Uses internal battery for location based service, whether or not the machine engine is turned on. This allows for a more precise location and does not rely solely on the machine battery to power the tracking device. Includes harness and external LTE/GNSS antenna
Benefits	A cost-effective, self-contained solution for equipment location, battery level and enhanced security; includes antenna	A cost-effective solution; CAN bus data access provides the most complete machine and engine information
