

UCHENNA ADUAKA

Data Analytics Engineering Intern

“In my search for an internship I applied to many different companies. I managed to receive 3 offers and JLG was one of them. Every part of the process was amazing. My interviewer and manager, Holly, has also been amazing. With just my interview call with her I got a great sense of JLG’s organizational culture. Upon starting the intern program, I’ve been very happy and grateful.

Working on my assigned intern project and doing actual work that’ll have lasting impressions on the business has brought me joy and fulfillment. To be able to collaborate with professionals who possess amazing skills in their own respective fields was also a highlight. Despite the fact my project was indeed tough, with the help of the team around me, my time at JLG reaffirmed me that their commitment to providing all workers with love and support made the whole experience worthwhile and one I recommend.”
