Subject: Tie Down and Lifting of JLG Products

Sir/Madam:

Pursuant to your inquiry for information regarding the noted subject, JLG, Industries, Inc. Product Safety & Reliability Department submits the following:

Enclosed you will find lifting information for the standard configuration of JLG product(s). When a JLG product is to be tied down or lifted by an overhead or mobile crane the following precautions must be taken:

Tie Down:

- When transporting a machine, the unit must be in the stowed position with the turntable lock pin engaged (if equipped) and the machine securely fastened to the truck or trailer deck at the designated tie down points.
- Ensure that all tie down equipment is adequately rated and suitable for the intended purpose.
- Remove all loose items from the machine prior to tie down.

Lifting:

- When lifting the machine it is very important that the lifting device and equipment is attached only to the designated lifting points and that the turntable lock pin is engaged (if equipped).
- Make adjustments to the lifting device and equipment to ensure that the machine will be level when elevated. The machine must remain level at all times while being lifted.

- Ensure that the lifting device and equipment is adequately rated and suitable for the intended purpose. Check the Operators and Safety manual and/or Service and Maintenance manual for approximate weight of the machine or, for certain models, the Serial Number plate for the actual weight of the machine as originally manufactured.
- Remove all loose items from the machine prior to lifting of the machine.

It is the user's responsibility to obtain any additional training regarding the proper lifting procedures of JLG Products that may be required. Please consult with your local, state, and employer regulations.

JLG Industries, Inc. assumes no responsibility or liability for any and all incidents involving personal injury, property damage, or equipment damage, which may occur from lifting JLG product(s).

Should you have any questions, or require additional information, please advise.

Sincerely,

JLG INDUSTRIES, INC.
