SKYGUARD™
INSTALLATION KITS

CUTTING EDGE TECHNOLOGY
IN ENHANCED CONTROL PANEL PROTECTION

SkyGuard™ is an innovation from JLG that provides operators with enhanced control panel protection that doesn't limit platform workspace or visibility. When the sensor is activated, SkyGuard stops all functions in use at the time of activation and it's unique reverse functionality - the first feature of it's kind in the market - temporarily reverses most functions for a short period of time. SkyGuard is available as an aftermarket kit exclusively from JLG.

Previous platform style

FEATURES / BENEFITS

- Can be activated from a variety of angles

- No moveable parts means there's no need for scheduled or additional maintenance

- A horn alerts other workers on the jobsite to sensor activation

- Kit includes all required hardware, components and instructions

Latest platform style

JLG®

1001201620	Platform Sensor	All E Boom models	Yes	Yes	

Non-UGM Ground Control Module

UGM Ground Control Module
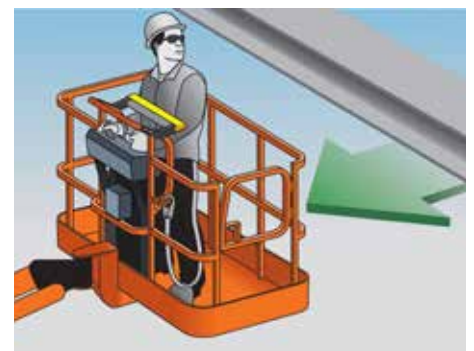

How to choose your kit:

- Identify which ground control module your machine is equipped with by consulting the photographs on page 2.
- Then determine which platform you have.
- To facilitate installation of an existing SkyGuard product on JLG lifts when installing new style platforms, customers will need to purchase the SkyGuard replacement kit separately.

Operator moves toward obstruction

Horn sounds upon operator contact with the bar

The auto reverse feature activates for most functions

SkyGuard™ is available for JLG boom lifts manufactured after 2004.
