Inspector Name & Address	Product Owner Name & Address
el of mobile elevating work platform	

All inspections are to be performed by a person qualified for the specific make and model of mobile elevating work platform.

PRE-DELIVERY: Must be performed prior to each delivery by sale, lease, or rental.
FREQUENT: Must be performed every three months or 150 hours of operation, whichever comes first.

☐ **ANNUAL INSPECTION:** Must be performed no later than 13 months from the date of the prior Annual Inspection.

Check each item below. (Refer to Operation & Safety and Service & Maintenance Manuals for specific information regarding inspection procedures and criteria.) Indicate in the appropriate space as each item has been performed. If the item is found to be not acceptable, record each

dis	crepancy. Correct all discrepancies prior to placing the machine back into service		
	P=Pre-Delivery, F=Frequent, A=Annual Mark as;		
	Y=Yes (Passed) N=No (Failed) C=Corrected NA=Not Applicable	P/F	Α
	FUNCTIONS AND CONTROLS		
1.	Machine has the latest control system software.		
2.	All joystick/toggle controls return to neutral/off position when released.		
3.	Detents properly lock controls in neutral/off position. Check condition of control enclosures and protective boots/guards.		
4.	All machine functions are disabled when the Emergency Stop Button is activated at the ground and/or platform control stations.		
5.	Manual descent system and/or auxiliary power system operates properly.		
6.	Load Sensing System operates properly.		
7.	SkyGuard operates properly.		
8.	Swing and Drive Brakes operate properly.		
9.	All function and speed limits/cut-outs operate properly.		
10	. All other machine controls, alarms, horn, displays, indicators, and functions operate properly at platform and ground control stations.		
	PLATFORM ASSEMBLY		
1.	Platform properly installed and secure. Mounting hardware free of damage and secure. Gate opens and latches properly.		
2.	Platform guardrails and floor in place, secure and free of damage.		
3.	SkyGuard properly mounted and free of damage.		
4.	Lanyard anchorage points secure, free of damage & labeled.		
	MAST AND PLATFORM ASSEMBLY		
1.	Boom sections, mast sections and related weldments free of damage, distortion and excessive wear.		
2.	Inspect all nuts, bolts, pins, shafts, shields, bearings, wear pads, locking devices, sheaves, sheave pins and bearings for proper installation, secure, no excessive wear, cracks or distortion.		
3.	Mast chains, cables and sequence cables are free of damage, properly installed, properly torqued and properly lubricated.		
4.	Mast covers are in place and securely attached for each section.		
5.	Mast operates smoothly to full height and descends smoothly, and is free of damage.		
6.	Powertrack is free of damage, distortion and excessive wear. Cables/hoses are properly routed, no chafing or leaks.		
7.	Inspect all cylinder pins, pivot pins, attaching and retention hardware for damage, distortion and excessive wear.		

TURNTABLE 1. Hood doors open and latch properly. Hood props in place, securing and functioning properly. 2. Turntable bearing, swing drive and gear secure, free of damage and properly lubricated. No missing bearing bolts or signs of looseness. CHASSIS 1. Wheel attachment hardware torqued properly. No missing attachment hardware. Inspect wheels for excessive damage and corrosion. 2. Proper wheels/tires installed. Inspect for excessive damage, wear and corrosion. If pnuematic, properly inflated and mounted 3. Steering components are properly installed and secure, no visible damage. POWER SYSTEM 1. Motors free of damage. 2. Battery fluid levels correct, Battery charger scrolls through diagnostics when plugged in. Batteries accept charge. 3. All electrical connections tight, no corrosion or abrasions. HYDRAULIC/ELECTRICAL SYSTEM 1. All cylinders free of damage with no evidence of leaks. 2. All areas around hydraulic components have no evidence of leaks. 3. Hydraulic oil system properly serviced and free of contaminants. 4. All hydraulic hoses, fittings and lines secure and free of damage. Check for chafing and leaks. 5. All electrical connections tight, no corrosion or abrasions. 6. Pump and motor secure, free of damage and leaks. 7. All hydraulic pressures properly adjusted. Y=Yes (Passed) N=No (Failed) C=Corrected NA=Not Applicable MANUALS AND DECALS	P/F	Α
Operation and Safety Manual, ANSI/SAIA Manual of Responsibilities (ANSI markets only), and AEM Handbook (ANSI markets only) in manual storage box.		
All safety, capacity and instructional decals installed, secure and legible.		Г
GENERAL		
Machine is free of unauthorized modifications or additions.		Γ
2. Applicable Safety Bulletins completed.		Γ
3. Inspect general structural condition including all welds.		Γ
4. Grease and lubricate per Service and Maintenance Manual.		
5. Drive and operate machine to test all machine functions.		
6. Record inspection date at "IMPORTANT" decal on frame.		
7. Notify JLG of any ownership changes.		
8. Is Annual Inspection due?		
Comments:		
		_

Inspector ensures that this machine has been inspected per each area of inspection.

Owner ensures all discrepancies have been corrected prior to	o placing the machine back into service.
