To: *Whom it May Concern*
Subject: *Recommended Parking of JLG Group B (Boom Lift) Mobile Elevating Work Platforms*

You have requested information regarding recommendations for parking JLG Mobile Elevating Work Platforms (MEWPs) with the boom in the elevated position. The Machine Operation section of the Operation and Safety Manual provides the following guidelines for parking and stowing procedure:

The preferred procedure to shut down and park the machine is as follows:

1. Drive the machine to a reasonably well protected area.
2. Ensure boom is fully retracted and lowered over rear axle.
3. Shut down Emergency Stop at Platform Controls.
4. Shut down Emergency Stop at Ground Controls. Position Platform/Ground Select switch to OFF (center position).
5. If necessary, cover Platform Controls to protect instruction placards, warning decals, and operation controls from hostile environment.

NOTICE: *If parking a MEWP with the boom elevated in an effort to conserve space, booms may be elevated, but shall not be extended. It is the Operator's responsibility to ensure all safety precautions in Section 1 of the Operation and Safety Manual are followed for each unique situation.*

Consult the Operation and Safety Manual for your specific JLG MEWP for additional information on parking procedures.

Current owners of JLG products are responsible for the safe and proper operating condition of the subject MEWP. Please consult with your local, state, and employer regulations for any additional requirements. It is the owners/users responsibility to ensure that JLG products are used as intended.

The operator is responsible for the safe and proper operation and utilization of the MEWP. JLG Industries, Inc. assumes no responsibility or liability for any and all incidents involving personal injury, property damage, or equipment damage that may occur from the improper utilization of JLG products.

Should you have any questions or require additional information, please advise.

Sincerely,
JLG INDUSTRIES, INC.
