

Multi-Reverse Camera System Now Available for SkyTrak® Telehandlers

Features & Specifications

Back up with confidence with the new multi-reverse camera system for SkyTrak telehandlers. This optional feature increases job site awareness by displaying multiple views from behind the machine— left, right, and rear. This system can be used for day or night operation and features three components— left and right side back-up cameras, rear back-up camera, and a tri-view monitor.

Left & Right Side Back-up Cameras

These compact back-up cameras easily mount to the back of the telehandler and provide a wide viewing angle behind the machine. Equipped with infra-red lights, they provide high quality pictures during day or night operation. The images are crisp and clear thanks to the 620 TV lines and the completely waterproof encasing allows them to operate in all weather conditions.

- 170° all-encompassing viewing angle
- High quality image - 620 TV lines
- Four infra-red lights for excellent night vision
- Completely waterproof - IP68 rating
- Surface mounts on back of the machine

Rear Back-up Camera

The RVS-812N 120° angle backup camera is the highest quality camera available on the market today. It boasts a 250,000 pixel, 2.1 mm lens with 30 infra-red illuminators, which enable you to see in total darkness. The die cast casing of the camera has an IP69K rating which can withstand all weather conditions and the built-in heater keeps the camera warm in the coldest of climates.

- Built-in heater that can withstand temperatures to -49° F
- 120° ultra wide viewing angle
- 30 Infra-red lights for superior night vision
- Completely waterproof - IP69K rating

Tri-View Monitor

The seven-inch, tri-view monitor features a TFT LCD digital color display with auto dimming. It is equipped with touch screen technology and is completely waterproof.

- Seven-inch digital color display
- Completely waterproof - IP69K rating
- Touch screen
- Auto dimming for low light conditions
