## NORTH AMERICA

June 2023

## INTRODUCING THE REDESIGNED ECOLIFT™ SERIES

JLG's EcoLift series is getting an upgrade. Now featuring enhancements that offer operators an unprecedented level of comfort and confidence, these models are your go-to lifts for non-disruptive, eco-friendly work at heights up to 13-ft.

The EcoLift 50 and EcoLift 70 feature platform updates, a smoother lift, and ergonomic enhancements that take low-level access to the next level, while still featuring the same patented, oil and hydraulic-free, stored power lift/lower system that delivers more uptime and lower total cost of ownership.

### FEATURES AND SPECIFICATIONS

#### NEW Steel Platform

- + Vertical rail update to provide enhanced protection for the operator.
- + Independent gate operation for more convenient entry & exit.
- + Welded holes in platform for enhanced visibility beneath the platform, as well as drainage and air flow—especially important for machines stored outside.
- + More ergonomic access to the platform, along with a steel step for added durability, better grip, and more convenient installation.

#### EcoLift 70 Enhancements

- + Improved castors that are easier to lock & unlock and feature better swivel and less resistance, requiring less effort when moving the machine.
- + Bubble level is now common with other LLA models for parts and serviceability efficiency.
- + Recovery tool relocated to the tower to reduce the potential for damage.
