

TO: All Access Equipment Suppliers to Leon, MX

DATE: September 2023

SUBJECT: Action required: JLG Leon migrating to new ERP Starting October 2023.
On September 30th all current POs will be cancelled, and new POs issued.

Supplier Partners,

JLG Leon and Laredo will be migrating from JD Edwards to Infor XA used by our U.S. facilities September 30, 2023. This improvement will enable JLG U.S. and JLG Mexico to utilize a single platform, enabling us to align our communications, processes, and metrics with our supplier partners.

JLG Leon **will not** be able to systematically transfer current purchase orders (PO) to the new system. The quantities, prices, and dates will remain the same but there will be new POs issued.

Key actions that will happen to manage purchase order changes.

1. Cancellation of all open purchase orders prior to September 30th.
2. Generation of new purchase orders using Infor XA ERP.
3. Suppliers **must acknowledge** new purchase orders the week of October 2nd.
4. Leon tactical team will share old PO / new PO table for you to update new PO numbers into your system.
5. Alignment between suppliers and JLG Leon the weeks of October 2nd and October 9th.

Important: If our systems are not aligned with the new POs released by the Inform XA ERP there could be an impact to our receiving process and therefore our payment processes.

Regarding any materials in transit prior to migration, we will request your shipping information to match with the newly issued PO's.

We appreciate all the work completed by your teams to facilitate this smooth transition.
