IMPROVE SAFETY, PRODUCTIVITY AND JOB SITE EFFICIENCY

JLG's Augmented Reality [AR] App utilizes advanced visualization and an intuitive user interface to enable faster, more accurate project planning and onsite equipment management. Featuring a suite of tools such as machine and accessory visualization, virtual controls viewer and annual inspection assistant, the AR App offers a holistic solution to make your workday more efficient.

SOLVING REAL WORKSITE PROBLEMS WITH AUGMENTED REALITY

- **Reduce costs and save time** with correct machine and accessory selection for the job.
- **Enhanced machine operation** with translated information operators need on the worksite.
- **Improved machine service** with AR-enhanced inspection tools.
- **Navigate virtual machines and loads** around your jobsite to confirm correct equipment and features.

Lower your total cost of ownership with a suite of tools designed for construction pros and real-world job sites. Free App requires no logins, and utilizes cloud-based content to minimize storage and maximize speed.

MACHINE VISUALIZATION

Choose with confidence the machine that best fits your project by virtually testing various pieces of equipment on your jobsite.

Reduce the likelihood of renting or purchasing an incorrect machine, preventing downtime caused by exchanges and corrections.

Utilize maintenance visualization as a helpful tool in meeting the ANSI requirement for a safe use program by ensuring you have the most practical equipment for the job.

Machine visualization available for over 150 different boom, scissor and low-level access models.

ACCESSORY KIT VISUALIZATION

View accessories virtually to see how they fit on equipment for better rental or purchasing decisions.

Understand the size and space requirements for storage of optional features for confident kit selection.

Maximize time and money by ensuring you're using the most efficient tools available for the job.

Kit visualization available for over 45 different boom and scissor kits and for most telehandler attachments.
